Publication Title:

THERMAL INK TRANSFER SHEET

Abstract:

Abstract of JP9175029

PROBLEM TO BE SOLVED: To provide a thermal ink transfer sheet which is highly sensitive and generates a high-quality image for the use as a masking film, a printing plate or a color proof. **SOLUTION:** This thermal ink transfer sheet consists of a coloring material capable of absorbing a semiconductor laser beam, a light/heat converting layer containing a binder and an imaging layer provided sequentially in this order on a support. In this case, the ratio of the absorptive area strength in a wavelength range of $\pm 30\text{nm}$ of a semiconductor laser beam to be used is set to 35% or higher for the total absorptive area strength in a wavelength range of 500-900nm of the light/heat converting layer.
